

PMP® Certification Preparation

Duration: 5 Days

Location: Houston/Katy, TX USA; Dubai, UAE or **Lagos, Abuja or Benin-City**, Nigeria

Instructor: Akin Oni, MBA, PMP, CPTM, CCP

Overview:

With more than 700,000 Project Management Professionals worldwide, the Project Management Institute's certification program is now a standard across all industries. Becoming a certified Project Management Professional (PMP)® involves meeting certain education and experience requirements, and passing a 200-question exam. ([PMP Certification Handbook](#) from PMI.)

The key to passing the exam is to understand the Project Management Institute's (PMI) view of project management. This means reviewing and understanding PMI's Guide to the Project Management Body of Knowledge (*PMBOK® Guide*), but also becoming familiar with how PMI expects project managers to apply that knowledge. In most cases, this requires PMP-candidates to become familiar with new concepts during their PMP exam preparation, and/or to "unlearn" practices that they have picked up over the years.

This course provides a solid foundation through the presentation and explanation of all the concepts you need to know, using a balanced mix of academic as well as tried and tested industry practices. While other PMP training courses focus on mere cramming to prepare you for the exam, we focus on you learning the tools that will be useful to you for life, i.e. well after your PMP education. No pre-reading is required before taking this course, but you should be prepared to study the materials we provide, as it's a closed book exam.

For Whom:

Course participants should be familiar with the certification process, and meet the PMP experience requirements prior to attending. You should also be reasonably familiar with modern project management techniques, as advocated by the PMI, and be planning on sitting for the exam within one month of completing this course.

Locations:

The course is offered on an open-enrolment basis at our PM Masterclass Facility in Houston/Katy, TX (which also serves Local, National and International Attendees) and **other select locations** such as Washington, DC; Bethesda, MD; Atlanta, GA; Las Vegas, NV; Calgary/Edmonton, AB, Canada; Dubai, UAE; London, UK and Abuja or Lagos, Nigeria. We also offer the course on an on-site basis anywhere in the world.

Objectives:

By the end of the course you will:

- Have a good understanding of PMI's approach to PM.
- Have a good knowledge of how the PMP exam is structured, and what kinds of questions to expect.
- Be very familiar with all sections of the *PMBOK® Guide*.
- Possess various insights, tips, techniques, and templates to help you retain information for the exam.

Course Details:

- **Methodology:** This 5-day, heavily interactive course is built around Rita Mulcahy's "PMP Exam Prep" textbook, a widely used PMP certification training tool. While participant input is encouraged, the focus of the course is kept on PMP exam preparation. The course meets the PMP certification training requirement of 35 hours of formal training. Participants receive a copy of the Rita Mulcahy's textbook, a copy of the *PMBOK® Guide*, and a course participant's binder for note-taking.
- **Delivery:** Classroom. No computers required.
- **Prerequisites:** Familiarity with modern project management techniques.

Course Content:

- SPACER
- Introductions
